

Our Printing Process

STRUCTURE's "print-ready" materials are electronic files that are properly sized and formatted, do not require any image or text editing, and fit all advertising specifications.

The standard for STRUCTURE magazine is a three column layout. The publication is currently saddle stitched, and is printed on 60# body stock. Covers are 80# paper, UV-coated. Printing is web offset, computer-to-plate.

Compressed Files

For compressed files, Zip files (.zip) are preferred.

Proof Sheets

Electronic (PDF) proofs of publication will be furnished in time for approval, provided all deadlines are met.

Furnished Inserts and Other Special Insertions

STRUCTURE magazine offers numerous opportunities for special insertions, including furnished inserts, tip-ins, polybags, and advertorials. Please contact the Production Manager for specific requirements and instructions.

What Format

High-resolution press quality PDF

Fonts and images must be properly embedded. The file should be saved as high-resolution for printing on press.

Native Application Files

Photoshop (PSD), Illustrator (AI), EPS, and InDesign (INDD) files are all accepted. All files must be accompanied with all linked images and printer fonts. Publisher can only accept PC Fonts; if Mac fonts are used, embed them in a PDF file or use the 'create outlines' feature for Illustrator files.
